

# VACUUM CONTAINERS

Wastequip vacuum containers safely handle and store hazardous and non-hazardous wet or dry waste, including oil, sludge, slurry, ash, mud, chemicals, and other environmentally-damaging materials. They're ideal for the oil and gas, pulp and paper, mining, automotive, power plant, and steel mill industries. By holding up to 300% more volume than vacuum trucks, Wastequip vacuum containers save valuable time and money.

### **VACUUM CONTAINERS**

- Hold up to 300% more volume than a typical 5-cubic-yard truck
- Safely handle oils, sludge, chemicals and other environmentally-damaging materials
- Fully-gasketed door is quality-tested against leakage
- Grease fittings on all working points
- One-year warranty

A vacuum truck bypasses its tank and pumps straight into the vacuum container, keeping the vacuum truck at the site working while vacuum containers are filled and hauled away.
